# Jouse3<sup>®</sup>

**Compusult Limited**  
**Assistive Technology**  
**www.jouse.com**

**Jouse3** is an advanced joystick-operated plug-and-play solution. Just move the precision joystick with your mouth, cheek, chin or tongue to control your computer, mobile device\*, switch-controlled device or AAC system.

## More than a Mouse!

**Jouse3** supports Windows, Macintosh, Linux and Unix based computers; Android and iOS based mobile devices\*; control for switch-enabled devices; and AAC systems with USB ports.

**Jouse3** offers high-quality and durable hardware and electronics. The mount and all required accessories are included.

With **Jouse3**, nothing is attached to you. You don't have to wear anything to control your computer.

All features are provided directly through **Jouse3** electronics. No additional software is required.

**Jouse3** includes an advanced, adjustable, articulated 3-joint arm with a single dial lock that mounts easily to almost any desktop, wheelchair or bedframe.

The **Jouse3** incorporates mounting options for additional equipment such as microphones, switches and Webcams.

It operates independently of any other pointing devices.

No external power supply is required, eliminating tangled wires and enhancing portability. Can sustain battery life of your device by using the auxiliary power option.

Comes with a two-year return-to-depot warranty and free technical support. Extended warranties are available.
