

# U-Switch 2-Switch

**USB-based switch  
controllers**

**Compusult Limited  
Assistive Technology  
[www.compusult.at](http://www.compusult.at)**

## U-Switch

The U-Switch is a USB-based switch controller for mouse actions that supports up to 6 standard switches and/or one multi-switch. You can also input text with the U-Switch using Morse code.

- **High-quality, low-cost, multi-switch and text input device**

## 2-Switch

The 2-Switch is a miniature USB-based switch controller for two selected mouse actions, two selected keyboard inputs, or one mouse action and one keyboard input. There are two versions of the 2-Switch; the 2-Switch Basic which has a fixed output, and the 2-Switch DIP which has selectable outputs. The 2-Switch mouse actions and/or keyboard inputs can be customized with each order. The 2-Switch supports up to two standard switches and requires only a minimum space. It's a perfect solution for single or double-switch scanning or custom keyboard control through switching.

- **Allows users to control mouse functions with standard switches**
- **U-Switch takes up to six single switches and/or one multi-switch controller**
- **U-Switch also supports text input via Morse code**

**Switches shown are not included with the U-Switch or 2-Switch**

# Ni-Yon SPOT

**USB-based switch  
controllers**

**Compusult Limited  
Assistive Technology  
www.compusult.at**

## Ni-Yon

Ni-Yon is a plug-and-play, USB-based switchbox that lets you simultaneously control a computer and up to 4 switch-enabled external devices using just 2 switches of your choice. Ni-Yon also has a battery-backup, so if computer power fails you can still operate the external devices, such as an alert system or switch-adapted mobile phone.

- **Ni-Yon features plug and play technology.**
- **Ni-Yon has battery backup and can be used in emergencies.**
- **SPOT sip-and-puff switch requires no external power.**
- **SPOT can be attached to your bed or desk via an optional bed mount.**

## SPOT

SPOT is a high-quality sip-and-puff switch that requires no power source. SPOT can connect to any device that accepts standard switches using a 3.5mm connector. An optional bed-mount, that simply slides under the mattress, is also available and includes a quick attach/release connector. Compared to other products, SPOT's single-piece gooseneck arm is longer, more flexible, and more durable than competing products; its sip-and-puff mouth-piece is more rigid and stable, and its control unit is much smaller.

*Switches shown are not included with the Ni-Yon or SPOT*
